PROFILE

Systems Engineering student with experience building digital products and analyzing data to support decision-making. Strong problem-solving mindset, combining technical skills with user-focused thinking to develop scalable and effective solutions. Interested in applying these skills to business areas such as marketing, partnerships, and operations.

WORK EXPERIENCE

IT Intern | Municipality of Campana | 2023

- Supported development and improvement of internal digital systems.
- Built and optimized React.js interfaces, enhancing usability and data access.
- Integrated REST APIs and collaborated using GitHub.
- Strengthened analytical thinking and teamwork under professional mentorship.

PROJECTS

Business Management System (Client Project)

- Delivered a custom full-stack solution (C#, ASP.NET Core, React, SQL Server) for a cabin rental business intended to improve operational organization.
- Led requirements gathering and translated business needs into efficient digital workflows.

Group Expense Tracking App

- Built a scalable React + Firebase app to manage shared travel expenses.
- Focused on usability and real-time data synchronization.

Artist Portfolio & Brand Identity

- Designed and developed a custom portfolio website with strong visual identity.
- Enhanced user engagement through interactive design (React, Framer Motion).

SKILLS

Business & Analytical: Data analysis (Power BI), problem-solving, user-focused thinking, agile methodologies

Technical: C#, ASP.NET Core, React.js, HTML, CSS, REST APIs

Databases: SQL Server, MongoDB (basic)

Tools: GitHub, Vercel, Linux, Figma, Firebase

EDUCATION

Bachelor's Degree in Systems Engineering – Universidad del Salvador (graduating Feb - June 2027)

LANGUAGES

Spanish (Native) | English (C2 – Proficient) | French (B1 – Intermediate)
